CAREER OBJECTIVE

I am a data analyst equipped in Excel, Python, R, MySQL and Tableau, with a strong foundation in economics and data analytics. I am proficient in translating data into actionable insights using data storytelling. I am eager to apply my research and analytical skills to drive informed decision-making.

SKILLS

Technical Skills: Advanced Excel, Python, R, SQL, Tableau, Statistical Analysis, Machine Learning and AI

Analytical Skills: Trend Analysis, Predictive Modeling, Data Interpretation and Problem-Solving

Soft Skills: Strong Communication Skills, Teamwork, Data Storytelling, Critical thinking and Proactive learning

EDUCATION

Symbiosis School of Economics, M.Sc. Economics (Data Analytics) GPA: 7.2 *expected May 2025*

MIT World Peace University, B.Sc. Economics (Hons) CGPA: 8.36 **Aug. 2020 - May 2023**

INTERNSHIPS

Exposys Data Labs **May 2024 - July 2024**

Data Science Intern

- Collected, cleaned, and analysed data to evaluate two projects: 50 startup companies and sports trends.
- Analysed and compared different machine learning algorithms to determine the most accurate prediction model.

Moneybee Group **Mar. 2023 - May 2023**

Equity Research Intern

- Reviewed investor reports and conducted fundamental research on the small-cap sector to identify key trends.
- Used Advanced Excel to create macroeconomic analysis reports and support strategic investment decisions.

ACADEMIC PROJECTS

Machine Learning Model for Circularity in the Food Supply Chain (Ongoing)

- Evaluated the trends of food imports and exports in the top 10 countries contributing to food losses from 2011 to 2022. Developed a machine learning model for food loss minimisation and reported optimisation measures.

Analysing the Consumer Confidence Survey

- Utilise Excel to clean and explore the data through exploratory data analysis.
- Performed consumer analytics by embedding machine learning algorithms through Python, in order to map/identify/track trends in consumer sentiments.

Optimizing Sales Performance through Data Analytics: A Case Study of D-Mart

- Analysed and cleaned D-Mart's sales, customer base, and product data to uncover trends, optimize sales, and enhance customer experience.
- Created dashboards using Tableau to visualize and underscore consumer trends and purchasing patterns thus discerning consumer behaviour and preferences.

Analysis of Investing habits among different age groups in Pune

- Analysed investment behaviours across multiple generations in Pune, focusing on the urban sample population.
- Identified key contrasts and patterns in investment approaches of various age groups to examine the underlying trends.

CERTIFICATES

- University of Washington, [Social Media Data Analysis](#) **May 2024**
- University of Michigan, [Applied Text Mining in Python](#) **June 2024**

EXTRA - CURRICULAR ACTIVITIES & ACHIEVEMENTS

- Assisted in the organisation of the annual cultural fest (Nivere) at SSE.
- Recognized by the university for achievements in athletics.
- Led the Ecocial Club as the Head, conducting social drives and activities at MIT-WPU.
